

I am concerned that changing to LPFM may displace certain stations that I listen to, such as Air1. Air1 is a service to everyone throughout the US and offers clean, alternative music. Music rarely can be enjoyed any more without hearing commercials which is what draws many to Air1, it being commercial free. Now you are going to force many to listen to commercials and filthy music with this change from fm to lpfm. Please allow fm translators to continue to operate so that I allow with thousands of others might enjoy the music that we want to enjoy listening to.
